in Max Young

Skills

- Web Application Competent in the design, front-end and back-end development, testing, optimization, deployment, and maintenance of web applications. Rich experience in [Python\(Django, Flask\)](#), Golang(gin), MySQL, MongoDB, HTML, JavaScript(jQuery, React), etc.
- Mobile I have developed a mobile application named Readom which have been published on the Google Play Store. [React Native](#).
- Computer Graphics
- Good comprehension of Computer Graphics theory. [Fundamentals of Computer Graphics](#) and [Real Time Rendering: Computer Graphics Notes](#).
 - Some practices in [OpenGL](#) and rendering pipeline: [OpenGL Rendering](#) and [Hit Bricks Game](#).

Experience

- 2022-now **Software Engineer, Rino.ai**, Beijing, autonomous driving
- **Vehicle Calibration Software** [Python](#), [Shell](#), [C++](#)
Independently developed from scratch, **revolutionizing the process** by automating operations and reducing communication costs.
 - **Enhanced factory calibration** for hundreds new vehicles, increasing daily throughput from 2-3 to **10+** vehicles.
 - **Streamlined field calibration**, reducing on-site time from 0.5-1 day to **under 0.5 hours**.
 - **OTA Version Management System** [Python\(Flask\)](#), [Next.js](#), [RabbitMQ](#)
Independently developed an OTA system, enabling efficient autonomous driving software updates.
 - **Automated software/map deployment**, reducing average download time for hundreds of vehicles from hours to **under 0.5 hours** with near-zero errors.
 - **Developed and deployed vehicle OS**, enabling easy version switching for operations users.
 - **Modernized vehicle/series/version management** with a user-friendly system.
 - **Kanban Project Management System** [Python\(Flask\)](#), [React](#), [Ant Design](#)
Independently developed a Kanban-based project management system for autonomous driving.
 - **Improved accident management**, supporting a reduction in the accident rate from 13 to **7 per 10,000 kilometers** within six months.
 - **Facilitated efficient delivery** of dozens of new routes.
 - **Enhanced team collaboration** by bridging the understanding gap between R&D and operations.
 - **Summary of Contributions:** Independently developed these projects, overcoming technical challenges across various domains. Demonstrated leadership in product design, project coordination, and communication between technical and operational teams.
- 2017-2022 **Software Engineer, Dedao APP**, Beijing, online Education
- develop e-commerce backend projects. Including SKU system, order system, distribution system, etc. Realized the automatic circulation and settlement of orders from JD.com, Tmall, etc, and greatly improves the efficiency of e-commerce business. [Python\(Django\)](#), [Go\(gin\)](#)
 - develop the financial system. Including financial recognition, financial settlement, data analysis, etc. Realized financial office automation and improved financial work efficiency. [Python\(Flask\)](#)
 - Promotes team TDD and contract testing, reduces bugs, and improves development efficiency.
- 2014-2017 **Software Engineer, kaoshixing**, Beijing, Exam SAAS Provider
- develope online exam system, including design, front-end and back-end development, devops, team management, etc. It has grown from scratch to more than 10,000 enterprise users. [Python\(Flask\)](#).

- 2013-2014 **Data Quality Engineer**, *AutoNavi.Alibaba*, Beijing, mapping services provider
Analyze map POI and road raw data, formulate quality inspection process specifications for map data, and provide decision support for collection plans and quality assessment.
- 2006-2013 **Geomatics Engineer**, *Beijing Engineering Corporation Limited*, Beijing, hydropower engineering
Participated in the survey and design of many large-scale hydropower projects at china and abroad.

Education

- 2002-2006 **Geomatics Bachelor**, *Hohai University*, Nanjing, China

Hobbies

- Languages English (*IELTS 6.5*) Japanese (*N2 Level*)
- Sport Beijing amateur marathon third-level athlete
